Summary — Frontend and Blockchain Developer focused on delivering well tested software and good practices, developing pixel perfect experiences that delivers performance and accessibility.

Skills

Languages	Portuguese, English	**Programming**	Javascript, Node.JS, CSS, Sass, HTML
Blockchain	Solidity, Architecture, Web3, Ethereum, ZKP, Hardhat	**Database**	Redis, Firebase, Mongodb, Postgre
		Cloud	AWS, Netlify
Frameworks	React, Next.JS, Nest.JS, Gatsby, React Native	**Tooling**	Docker, Helm, CI/CD, Jenkins

Experience

Multivision   Sep 2022 –
Frontend Engineer (Consultant)

Client: Vodafone (Next.js — Docker — Node.JS — Java — Jest)

– Optimized websites performances
– Implemented new microservices to support the IOT projects
– Managed content to serve the tenants and countries in Europe
– Automated routine tasks using scripts to reduce manual effort and increase productivity

Client: Farfetch (Next.js — Docker — Helm — Nest.js — Kubernetes — Elastic — Redis)

– Configured monitoring tools to track system performance and troubleshoot issues proactively
– Developed apps to list feeds of products and multi-tenant solutions
– Documented system configurations and procedures for knowledge sharing within the team
– Created new tools and services to stream large files through the services

Bitfy Exchange   Dec 2021 – Sep 2022
Blockchain Developer

(Nest.js — Docker — Solidity — Ether.js — Solidity — Hardhat)

– Developed and maintained back-end code for web3 applications and smart contracts
– Created micro-services to support new currencies, enhancing platform capabilities and introducing a Blockchain as a Service (BaaS) solution.
– Configured and monitored network security measures, including firewalls and intrusion detection systems
– Maintained legacy code in Next.js while expanding app functionalities to support NFT transactions
– Maintained documentation for IT policies and procedures

Avenue Code   Aug 2021 – Feb 2022
Front-end Developer

(Typescript — Redux — Gatsby.js)

– Participate in meetings and business decisions
– Updated old tools to use more advanced concepts of Javascript and React
– Developed web apps based on old spreadsheets and powerBI dashboards previously used

Guerra Finanças   Jun 2019 – Sep 2021
Software Engineer

(Gatsby.js — Docker — AWS — Redux — Firebase — Node.js — GraphQL — Figma)

– Managed and mentored a small development team, fostering collaboration and ensuring timely delivery of projects
– Led the development of solutions for sales and financial teams, such as product landing pages, custom spreadsheet plugins, and interactive dashboards
– Designed and implemented scalable tools to streamline workflows and improve operational efficiency
– Prioritized user-focused functionality, balancing technical requirements with business needs to drive project success

Atimos.Co   Jul 2018 – Jun 2019
Mobile Developer

(React Native — Expo — Redux — Figma — Firebase)

– Skilled in end-to-end application and dashboard development, contributing across all stages from requirements gathering to UX/UI design and hands-on coding
– Proficient in React, with expertise in creating modular and responsive components for dynamic user interfaces
– Collaborative team player, adept at translating stakeholder needs into visually appealing and functional solutions

Education

Universidade de Brasília - Software Engineering
Universidade Católica de Brasília - Systems Analysis and Development
IGTI - MBA in Blockchain Applications and Development

Certifications

- IGTI - Certified Mobile Developer
- Blockchain Council - Certified Solidity Developer
- 101 Blockchain - Certified Enterprise Blockchain Architect
